SOCIETY FOR CARDIOVASCULAR PATHOLOGY

<http://scvp.net>

Cornotes, now incorporated into the pages of *Cardiovascular Pathology*, serves to disseminate meeting information, news about SCVP members and activities.

Meeting information, announcements or general information of interest to SCVP can be sent to:

James B. Atkinson, M.D., Ph.D.

Department of Pathology Room C 3321 MCN

Vanderbilt University Medical Center

Nashville, TN 37232-2561

e-mail: james.atkinson@vanderbilt.edu

MEETING ANNOUNCEMENT

United States & Canadian Academy of Pathology 103rd Annual Meeting

March 1-7, 2014
San Diego Convention Center
San Diego, CA

Society for Cardiovascular Pathology

Saturday, March 1st: Evening Session: Role of Viral PCR
in Myocarditis

Sunday, March 2nd: Companion Meeting: Prognostic
Cardiac Pathology

Society for Cardiovascular Pathology Sunday Companion Meeting

USCAP, San Diego

March 2, 2014

Prognostic Cardiac Pathology

Moderators: James R. Stone, MD, PhD
Massachusetts General Hospital, and Maximilian Buja,
MD, University of Texas Health Science Center
at Houston

“Diagnostic and Prognostic Value of C4D Staining in
Transplant Endomyocardial Biopsies,” Gerald Berry,
MD, Stanford School of Medicine

“Predicting the Development of Cardiac Allograft
Vasculopathy,” Michael Fishbein, MD, UCLA Medical
Center

“Novel Prognostic Tissue Markers in Congestive Heart
Failure,” James R. Stone, MD, PhD, Massachusetts
General Hospital

Young Investigator Award Presentation

SCVP Distinguished Achievement Award Lecture, “Four
Faces of Prosthetic Heart Valves,” Jagdish Butany,
MBBS, MS, FRCPC, University of Toronto

Society for Cardiovascular Pathology Young Investigator Award

Any trainee who has an abstract in the area of cardiovascular pathology that is accepted by the USCAP for the 2014 Annual Meeting is eligible for consideration of the *Society for Cardiovascular Pathology Young Investigator Award* (\$500). A copy of the abstract should be submitted to Gayle Winters, MD, Chair, SCVP Young Investigator's Award Committee, at gwinters@partners.org.

MEETING LIST

- 1. High Blood Pressure Research 2013 Scientific Sessions**, New Orleans Marriott, New Orleans, LA, September 11-14, 2013. www.my.americanheart.org/hbprsessions.
- 2. North American Vascular Biology Organization, Vascular Biology 2013**, Cape Cod, MA, October 20-24, 2013. www.navbo.org/vb2013.
- 3. American Heart Association 2013 Scientific Sessions**, Dallas Convention Center, Dallas, Texas, November 16-20, 2013. www.scientificsessions.org.
- 4. The International Society for the Study of Vascular Anomalies**, Melbourne, Australia, April 2-4, 2014. www.issva2014.com.
- 5. Experimental Biology 2014**, San Diego, CA, April 26-30, 2014. www.faseb.org/meetings.

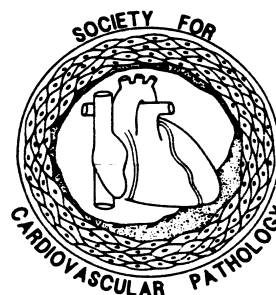

6. Cardiac Regulatory Mechanisms, Gordon Research Conferences, Colby-Sawyer College, New London, NH, June 8-13, 2014. www.grc.org/programs.

7. Lipoprotein Metabolism, Gordon Research Conferences, Waterville Valley Resort, Waterville, NH, June 15-20, 2014. www.grc.org/programs.

8. Frontiers in CardioVascular Biology 2014, Barcelona, Spain, July 4-6, 2014. www.escardio.org/congresses.

9. Endothelial Cell Phenotypes in Health & Disease, Gordon Research Conferences, Melia Golf Vichy Catalan Business & Convention Center, Girona, Spain, July 6-11, 2014. www.grc.org/programs.

10. North American Vascular Biology Organization, Vascular Biology 2014, Pacific Grove on Monterey Peninsula, California, October 19-23, 2014. www.navbo.org/vb2014.

The International Society for Applied Biology 14th Biennial Meeting

April 2-5, 2014
Tudor Arms Doubletree Hotel
Cleveland, Ohio

Nationally and internationally respected investigators whose research work is relevant to translational cardiovascular biology will present their latest research results to address topics including critical issues in the clinical implementation of cell-based therapies for cardiovascular disease and the potential clinical relevance of stem cell therapies and their translation into the clinic; new research findings in cardiovascular mechano-biology and pathobiology and their implications in clinical care; the interactions of biomaterials with tissues and their implications in improving cardiovascular device design and utilization; novel cardiovascular diagnostics, imaging and therapeutics and their relevance to clinical care; and, barriers and solutions to issues of translation, regulatory science and commercialization.

A satellite program preceding the conference will be held at the Lerner Research Institute on the campus of the Cleveland Clinic entitled "Stem Cells for Disease Modeling and Regenerative Therapeutics."

An objective for the meeting is to encourage submission of abstracts and participation by young scientists throughout the world who are considering a career relevant to applied or translational cardiovascular research. Five Allan D. Callow, M.D., Ph.D. Young Investigator Awards will be presented to authors of these outstanding research submissions. To qualify for the Young Investigator Award, the presenting author must be responsible for the scientific content of the abstract and be in a "training" program (postdoctoral fellow, resident, graduate student or medical student). The abstracts of all Young Investigator Award applicants will be reviewed and the authors of the top 5 ranked abstracts will receive the awards.

Growth and Wasting in Heart and Skeletal Muscle Keystone Symposia Conference

Eldorado Hotel & Spa, Santé Fe, New Mexico
January 26-31, 2014

Topics and addresses include "New Myogenic Regulatory Molecules and Mechanisms," "Growth Factors for Heart and Muscle," "Genetic and Epigenetic Regulation," "Common Pathways in Cardiac and Skeletal Muscle Growth," "Metabolic Regulators of Cardiac Regeneration and Hypertrophy," and "Stem Cells and Cardioskeletal Growth."

Abstract Deadline: 10/30/13

Discounted Registration Deadline: 11/26/13

www.keystonesymposia.org

Society for Cardiovascular Pathology Symposium: Stem Cells for Cardiac Repair

Experimental Biology 2014

San Diego, CA
April 26-30, 2014

Chairs: James Stone and Monte Willis

Sponsored by *American Society for Investigative Pathology* and the *Society for Cardiovascular Pathology*
